

Product Data Sheet

Recombinant Mouse IL-1β (ELISA Std.)

Catalog # / Size: 575109 / 4 pack

Source: Mouse IL-1\(\beta\), amino acids Val118-Ser269 (Accession # NM_008361) was expressed in E. coli, approximately 17 kD.

Preparation: ELISA Standard 4-Pack contains four vials of recombinant mouse IL-1β at >5 ng per vial. Recommended for ELISA

application only. Standards are calibrated against a BioLegend Master Calibrator.

Formulation: Lyophilized in sterile-filtered PBS, pH 7.2, containing 1% BSA.

Storage: Upon receipt, store unopened vials at 4°C immediately and use within 12 months from date of receipt. Prior to use,

reconstitute the lyophilized powder with 0.2 ml of PBS containing a carrier protein (e.g., 1% BSA, protease free), pH7.4. Re-cap vial, vortex. Allow the reconstituted standard to sit at room temperature for 15 minutes, vortex again to mix completely. The reconstituted standard stock solution can be aliquoted into polypropylene vials and stored at -70°C for up to one month. Do not re-use diluted standards. Use a manual defrost freezer and avoid repeated freeze

thaw cycles.

Applications:

Applications: ELISA

Recommended Usage: Each lot of this protein is quality control tested by ELISA assay. For use as an ELISA standard, a standard curve

comprised of doubling dilutions from 2000 pg/ml to 31.3 pg/ml is suggested. It is recommended that the reagent be

titrated for optimal performance for each application.

This IL-1 β protein is useful as a standard for a mouse IL-1 β sandwich ELISA, using unlabeled B122 antibody (Cat. **Application Notes:**

No. 503502) for capture and biotinylated Poly5158 antibody (Cat. No. 515801) for detection.

Description: IL-1 refers to two proteins, IL-1 α and IL-1 β which are the products of distinct genes, but which are recognized by the same cell surface receptors. IL-1β is a potent immuno-modulator which mediates a wide range of immune and

inflammatory responses including the activation of B and T cells. The B122 antibody reacts with the precursor and mature secreted forms of mouse IL-1β. This antibody also recognizes rat IL-1β. The B122 antibody can neutralize the

bioactivity of natural or recombinant IL-1β.
