

Purified anti-BG-3 Antibody

IHC staining of anti-BG-3 Antibody (clone CLCP-19B) on formalin-fixed paraffin-embedded human kidney tissue. The tissue was incubated with the primary antibody at 10 μ g/ml for 20 minutes at room temperature. BioLegend's Ultra Streptavidin (USA) HRP Detection Kit (Multi-Species, DAB) was used for detection followed by hematoxylin counterstaining.
