

**Recombinant Mouse P-Selectin (CD62P)-Fc Chimeric (carrier-free)**

Immobilized mouse P-Selectin (CD62P) at 2 µg/mL (100 µl/well) induces 90-100% adhesion of U937 cells. BioLegend's protein was compared side-by-side to a competitor's equivalent product, where it shows that the competitor's effects cannot be detected when using the recombinant mouse P-Selectin (CD62P) protein.
