

Purified anti-GFAP Antibody

IHC staining of anti-GFAP antibody (clone SMI 24) on formalin-fixed, paraffin-embedded rat brain tissue. After antigen retrieval using Retrieve-All Unmasking System 3, the tissue was incubated with the primary antibody at 0.5 µg/mL for one hour at room temperature. Ultra Streptavidin (USA) HRP Detection Kit was used for detection followed by hematoxylin counterstaining.
